Kenneth,

I am writing in regards to the development along Western Avenue including the clear-cutting of the site on March 26th, 2020.

It is unacceptable that the correct process for clearing this land was not followed. After the March 25th hearing was rescheduled the development of this land, *by law*, needed to stop until the hearing was held. The town has proven itself unable to follow correct processes in regards to the development of this land, and therefore needs to step down as the organization responsible for the environmental review.

There are severe consequences of this development from an environmental perspective as well as a traffic and pollution perspective. The town needs to take these consequences seriously and address these concerns with tangible action plans to mitigate environmental risk prior to development proceeding.

The Guilderland Town Planning Board needs to recognize its missteps and step down from running this project to ensure an unbiased evaluation going forward.

Regards,  
Andrea Schwartz
