Town of Guilderland Officials,

I have owned my own union carpenters construction company for twelve years. Like nearly all small businesses, I work hard to recruit talented employees and spend countless hours looking for future projects to keep all our hands busy.

But unlike nearly all my colleagues in this industry and in our region, I am proud to say that I have a woman-owned, union business. Our team is the most dedicated group of professionals I have had the pleasure of working with, and I am even more proud of the fact that we consider ourselves one large family.

We have been fortunate to have worked with Pyramid Management on several different construction projects over the years. As with nearly all work done with Pyramid, they have high standards and clear budgets and timelines. The organization produces excellent results because they expect excellent results.

They are now planning on building a Costco and mixed-use space on their property. I know they will create first-class buildings and will not have any problem getting tenants. We should welcome their continued investment into our community and support their efforts to create hundreds of jobs and support countless businesses in the Capital Region.

I ask you to support these plans and our regional workforce.

Respectfully,

Audra Paro

Owner
